

MERIDIAN AUDIO TO BRING HIGH-RES SOLUTIONS TO ISE 2018

ISE
2018

December 2017

Meridian Audio will be showcasing innovative new products and exciting partnerships at ISE 2018 (Stand 7-E210.) Visitors can see and hear Meridian's hi-res audio solutions, including a number of versatile new products, and learn how to create the best possible listening experience for their clients.

"Integrators and our customers care about an authentic audio experience," says Katy Bradshaw, Meridian's director of marketing. "We've listened to what they've told us, and we're delighted to bring a great series of Meridian products to ISE 2018. These innovations underline how we share the same goals - transforming the way people experience sound."

Meridian will unveil the **UHD722 Ultra High Definition Audio Processor** at ISE 2018. This 4K switching solution incorporates Multichannel Meridian High Resolution (MMHR) output, enabling connection to existing processors, which results in a significant uplift in the audio system's sound quality. Providing the perfect link for seamless, high resolution audio, the UHD722 features Meridian's unique high resolution Upsampling and Apodising technologies to offer the best possible performance from Blu-ray Disc®, satellite/TV receivers and gaming consoles.

In addition, with new, updated features, the award-winning **M6 Digital Active Loudspeaker** will also be on demonstration. For the first time, The M6's signature room-filling sound is now available with just a single loudspeaker thanks to its new "mono" mode. Both the left and right channels are summed, meaning you don't lose any of the information, enabled using our Meridian's unique mono algorithms, first developed in the popular in-wall DSP320. The M6 is not only visually stunning, but also provides perfectly matched and sonically balanced sound in any room.

Exclusively for ISE 2018, integrators will be able to preview the **210 Streamer**, designed to bring Bluetooth, Apple Airplay and Spotify Connect to Meridian products. Additional innovations from Meridian's growing 200 series range are also on display. These include the **271 Digital Theatre Controller**, which provides the perfect link to integrate any analogue or digital AV processor or receiver with Meridian's DSP loudspeakers, and the **251 Powered Zone Controller**, bringing Meridian's superior audio performance to a variety of analogue speaker applications.

For the complete home cinema solution, Meridian will be on hand to inform visitors of its complimentary **Design and Specification Service**. This service delivers complete schemes quickly, featuring Meridian products alongside technologies from Meridian partners, including Barco Residential, Display Technologies and Cinema-ATS acoustic treatment, allowing integrators to save design time on a project. Visitors to Barco's sound room at ISE 2018 (Sound Room E107) will have the opportunity to experience Meridian' renowned sound quality together with Barco projectors.

As part of the Professional Development Programme at ISE 2018, Meridian's Education Manager, Hugo Fitzjohn will host **Streaming Hi-Res Audio in the Home** on Tuesday 6th February from 14:00 – 15:30pm in Room D201. To find out more information and to book a place on this education session, visit www.iseurope.org/shop.

ABOUT MERIDIAN AUDIO

Since 1977, Meridian Audio has been crafting innovative, elegant, high performance audio solutions. From its compact DSP loudspeakers with integrated amplification, to its user-friendly music management platform, Sooloos, Meridian delivers easy to install, high resolution audio systems for home cinemas and whole home solutions. The Meridian Audio experience is now available in the latest models from Jaguar Land Rover, thanks to a collaborative partnership between these two leaders of British innovation and engineering. Meridian's renowned audio quality has extended to new markets including consumer electronics, in partnership with LG Electronics (LGE), marine and airline, ultimately transforming the way people experience sound, wherever they are.
