

January 2023

MERIDIAN AT ISE 2023

Meridian will be showcasing a number of its audio solutions on the AVEMEA booth (2H150) at ISE 2023, including the flagship DSP8000 XE loudspeaker in Volcanic Red.

The DSP8000 XE is the first Meridian loudspeaker to emerge from the company's Extreme Engineering Program which commenced more than six years ago. It is built on a brand-new audio architecture, using higher specification, more powerful components and leveraging Meridian's expertise in psychoacoustics to achieve exceptional sound quality.

Also on display will be Meridian's DSP750 loudspeaker, which combines high dynamic range, incredibly low distortion, and outstanding signal-to-noise ratio combine to provide full-range audio with exceptional headroom and low listener-fatigue. It delivers a maximum output of 120dB and bass extension down to 30Hz.

Meridian will show its DSP3200 loudspeakers in a striking Volcanic Orange colour. These compact speakers provide a powerful performance and are designed for intimate listening spaces or as part of a larger installation. The speakers employ Meridian's award-winning DSP technologies with two integrated amplifiers, on-board digital signal processing, and two drivers.

The Meridian display will also include the 210 Streamer, the 218 Zone Controller, a 258 Power Amplifier, a 271 Digital Theatre Controller and the 251 Powered Zone Controller. Visitors will also be able to discuss Meridian's complimentary Design and Specification Service, which supports project planning and presentation and makes it quicker and easier for integrators to specify the right products for the installation.

The Meridian team invites visitors to join them at a drinks reception at 5pm on Wednesday 1st February on stand 2H150.
